

"PASSION, when you think about Clayton the one word that always comes to mind is passion. Over the course of the last six years, I have had the opportunity and pleasure to not only work with Clayton in a variety of professional areas, but observe him teach and present. Clayton is so passionate about providing students with a quality physical education he never takes the time to slow down and relax.

Clayton travels the country inspiring other professionals to become better teachers and achieve more in their classrooms. Clayton's presentations are dynamic and inspiring to teachers as they see how easy it is to integrate not only the national standards but core subject areas as well. I always enjoy talking to people after they have attended one of Clayton's sessions, because they are always inspired. It is my pleasure to call Clayton a true Quality Physical Educator."
