Final PowerPoint Portfolio Project

1. Introductory Slide – You should name your presentation what ever you would like.
The first slide should also include your name and the class period of your class.

2. Organization- The slides in your presentation should flow from one topic to another in a logical order.
You may want to write an outline of the topics you want to present.

3. Accuracy – Double check to make sure you have the correct definition for key terms. Make sure that any pictures you place on a slide match what you are trying to demonstrate.

4. Select colors with care - Experiment with color combinations, but make sure they work well on a screen. Text needs to really contrast from the background in order to show up on a screen. Make sure the text font size is going to be big enough to present across a room.

5. Avoid using too many animated texts, sounds, and fancy transitions - These may take up too much memory and you may run into problems sending your assignment in to me. They may also be too distracting from demonstrating the concepts of fitness you are trying to illustrate.

6. Your presentation should include - each of the six national standards, all of the health related and skill related fitness components, all of the fitness principles that you have learned in class.

7. Your presentation should include – a minimum of 10 slides and demonstrate your knowledge of physical activity. Try to illustrate how you intend to use what you have learned in physical education and why being physically educated is important.

8. Pictures – Cut and paste pictures from the internet that illustrate the concept or principle that you are describing.

9. Email: Identify yourself by typing "PE Project for: *your name and period number"* in the subject line of the email. This is because I may not recognize you by your email address. Don't forget to attach the PowerPoint to the email.

Presentation Rubric	**4**	**3**	**2**	**1**
Your presentation should:	Include everything required from the list above. It demonstrates the student's maximum effort and value of physical activity.	Include some of the required elements from the list above. It demonstrates the student's effort and value of physical activity.	May include some of the required elements from the list above. It may demonstrate the student's effort and value of physical activity but might not meet the requirements completely.	Does not include the requirements for this project. Effort is not evident.
